

BIOGRAPHY

Sara Khalid

Professor Sara Khalid is an Associate Professor of Health Informatics and Biomedical Data Sciences, University of Oxford. She is Head of the Planetary Health Informatics Lab and Machine Learning Lead at the Centre for Statistics in Medicine at the Botnar Research Centre, University of Oxford.

Sara's research applies artificial intelligence to international real-world health and environment data through whole-exposome approaches, to further our understanding of disease and fills the gaps in global health equity, leveraging common data models and federated network analytics.
